## OCCUPATIONAL SAFETY—HEALTH MANAGEMENT SYSTEM — OSHMS

BRS offers accredited third-party services to help manage controls that objectively and competently demonstrate occupational health and safety risk management. Through BRS OSHMS programs, whether BS OHSAS 18001, ILO-OSH, ISO 45001... these will help to manage legal obligations, adherence to regulations and contractual agreement such as 29 CFR 1910... enablers to identify, analyze and act on hazards resulting in appropriate management of occupational risks.

**BRS OSHMS provides the flexibility to pursue OHSAS 18001, LP or ILO-OSH**

Implementation of occupational safety and health management can effectively lead to improve the

organization's performance through *loss control and prevention*.

BRS OSHMS benchmark specification standards includes:

- ISO 45001
- ILO-OSH
- OHSAS 18001
- Loss Prevention (LP)

Occupational Safety-Health Management System (OSHMS) provides a framework to;

- Reduce disruption due to accidents,
- Reduce Workers Comp claims,
- Assist complying with regulatory requirements,
- Demonstrate due diligence, shall your organization ever need,
- Contribute to the morale and high level and esteem,
- Assist promoting and maintaining organization image,
- Expedite the safe, successful induction of personnel,
- Assist in the induction of new personnel or cross functional training, and
- Add requirements to suppliers and contractors thus reducing hazards—risks
- Demonstrate adherence to agreements and regulations to others such as stakeholders... and
- Integral to demonstrating Social responsibility

OSHMS requirements contributes to compliance with legal obligations and regulations ILO-OSH follow a structure similar to BS OHSAS 18001, ISO 45001 and Loss Control & Prevention including:

- OS&H Requirements clauses
- General Requirements
- Policy
- Planning
- Implementation and Operations
- Verification and acting
- Management Review
- Continual Operational Enhancements

## OHSAS, ILO-OSH or Loss Prevention

It is the goal of BRS OSHMS to provide a management tool for client-organizations to plan and perform activities following safe and health best practices while in adherence to regulations.

Equally, BRS OSHMS is an exclusive certification system or mutually inclusive to our commitment to adding-value (AVA).

To achieve OSHMS BRS provides guidelines considering OHSAS 18001, Loss Prevention, ILO-OSH for the protection of the organization, personnel and other stakeholders. The success of main-

taining high protection depends on the commitment from all levels and functions in the organization, commencing with top management. To achieve BRS OSHMS organizations may chose paths from Loss Prevention, OHSAS or ILO-OSH.

BRS OSHMS is for organizations regardless of the nature of their products and activities, that wish to demonstrate objective evidence of implementation of best practices.

OSHMS has been developed to be compatible with QMS ISO 9001, EMS ISO 14001, ISO 13485, ISO 22000. Manage-

ment Systems Integration helps organizations to save on registration costs.

OSHMS provides an effective and efficient scheme to implement, sustain and improve the safety of any given organization or enterprise culture, such that personnel, enterprise, supply-chain *et al* stand to benefit as well compliance.

BRS in developing OSHMS, we are confident that it will become a mean to ensure that work environments are safe and secure.

## OCCUPATIONAL SAFETY—HEALTH MANAGEMENT SYSTEM — OSHMS

### What is BRS OSHMS—BS OHSAS 18001?

ISO 45001, BS OHSAS 18001 is internationally recognized and generally benchmark to manage occupational health and safety risks. These are the basis for occupational safety-health management systems (OSHMS).

BRS assess OSHMS applying Assessment Guidance Document OSHMS. The references for the development of OSHMS Guidance Document includes...

- BS OHSAS 18001
- 29 CFR 1910, in reference
- ISO 45001 OH&S MS Requirements
- American National Standard for Occupational Health and Safety Management Systems Z10—ANSI/AIHA Z10,
- BS8800 Guide to occupational health and safety management systems,
- International Maritime Organization –Safety of Life at Seas (SOLAS), as applicable
- DNV Standard for Certification of Occupational Health and Safety Management System (OHSMS): 1997, and
- Compatible with many others safety management systems (SMS)

Just names a few for which compliance is an obligation and for OSHMS to contribute to organization's loss control & prevention.

BRS OSHMS aligned with BS OHSAS 18001 (*Occupation Health and Safety Assessment Series*) or ISO 45001... contributes to organizations in identifying, analyzing and controlling hazards that relate to on-the-job occupational health and safety. This in turn contributes to the reduction of risk.

BRS OSHMS, aligned with recognized benchmarks is in response to the demand to harmonized obligations, regulations, practices and methods worldwide, and one which an organization can be assessed for a declaration of attestation.

### What is ISO 45001?

Replaces British Standard OHSAS 18001 for year 2016. The progression of this publication begins in Spring 2014 advancing as planned to Fall 2016. As follows, the structure of the publication:

1. Scope
2. Normative references
3. Terms & definitions
4. Context of the organization
5. Leadership
6. Planning
7. Support
8. Operation
9. Performance Evaluation
10. Improvement

BRS OSHMS includes ISO 45001 after its publication, which focuses on safety and health for the well being of collaborators, associates, visitor and other stakeholders, as well provide contributions to assure sustainability of organization's bottom—line. To contribute to the sustainability of the organization needs to address productivity, financial performance, quality, as well other key indicators that the organization has determined within its business objectives.

Whether OHSAS 18001, ILO-OSH, Loss Prevention... BRS OSHMS addresses legal obligations, regulations and contractual agreement through:

- Communities and consumer protections,
- Managing Leadership,
- Employee Participation,
- Identification, classification and planning,
- Implementation and operational controls,
- Evaluation of effectiveness
- Corrective Action,
- Management Review
