OCCUPATIONAL SAFETY—HEALTH MANAGEMENT SYSTEM — OSHMS

BRS offers management systems certification for organizations to objectively demonstrate occupational health and safety risk management. Through BRS OSHMS programs, whether OHSAS 18001, ILO-OSH, Z10 or any other, enables organizations to identify, analyze and act on hazards resulting in appropriate management of occupational risks. Implementation of occupational safety and health management can effectively lead to improve the organization's performance.

BRS OSHMS provides the flexibility to pursue OHSAS 18001, LP or ILO-OSH

BRS OSHMS specification management standards such as:

- Z10
- ILO-OSH
- OHSAS 18001
- Loss Prevention (LP)

...provide benefits to organizations.

OSHMS provides a framework to;

- Reduce disruption due to accidents,
- Reduce Workers Comp claims,
- Assist complying with regulatory requirements,
- Demonstrate due diligence, shall your organization ever need,
- Contribute to the morale and high level and esteem,
- Assist promoting and maintaining organization image,
- Expedite the safe, successful induction of personnel,
- Assist in the induction of new personnel or cross functional training, and
- Add requirements to contractors thus reducing hazards—risks
- Demonstrate conformance to others such as stakeholders... and
- Demonstrate Social responsibility

OHSAS, ILO-OSH or Loss Prevention

It is the goal of BRS OSHMS to provide a management tool for client organizations to plan and conduct activities following safe and health best practices.

Equally, BRS OSHMS is an exclusive certification system or mutually inclusive to our commitment to adding-value (AVA).

To achieve OSHMS BRS provides guidelines considering OHSAS 18001:1999 / 2002, Loss Prevention, ILO-OSH for the protection of the organization, personnel and other stakeholders. The success of

maintaining high protection depends on the commitment from all levels and functions in the organization, commencing with top management. To achieve BRS OSHMS organizations may chose paths from Loss Prevention, OHSAS or ILO-OSH.

BRS OSHMS is for organizations regardless of the nature of their products and activities, that wish to demonstrate objective evidence of implementation of best practices.

OSHMS has been developed to be compatible with QMS ISO 9001, EMS ISO 14001 and

EMAS facilitating integration. Management Systems Integration helps organizations to save on registration costs.

OSHMS provides an effective and efficient scheme to implement, sustain and improve the safety of any given organization or enterprise culture, such that personnel, enterprise, supply-chain et all stand to benefit.

BRS is pleased to develop OSHMS, and we are confident that it will become a mean to ensure that work environments are safe and healthy.

OSHMS requirements, while fulfilling ILO-OSH follow a structure similar to OHSAS 18001:1999 / 2002 and Loss Prevention including:

- OS&H Requirements clauses
- General Requirements
- Policy
- Planning
- Implementation and Operations
- Verification and acting
- Management Review
- Continual Improvement

OCCUPATIONAL SAFETY—HEALTH MANAGEMENT SYSTEM — OSHMS

What is BRS OSHMS—OHSAS 18001?

The specification OHSAS 18001 is internationally accepted to manage occupational health and safety management.

BRS assess occupational safety-health management systems (OSHMS) applying Assessment Guidance Document OSHMS. The references for the development of OSHMS Guidance Document includes...

- American National Standard for Occupational Health and Safety Management Systems Z10—ANSI/AIHA Z10-2005,
- BS8800:1996 Guide to occupational health and safety management systems,
- International Maritime Organization –Safety of Life at Seas (SOLAS),
- DNV Standard for Certification of Occupational Health and Safety Management System (OHSMS): 1997, and
- Compatible with many others safety management systems (SMS)

BRS OSHMS aligned with OHSAS 18001 (*Occupation Health and Safety Assessment Series*) is to contribute to an organizations in identifying, classifying and controlling hazards that relate to occupational health and safety. This in turn contributes to the reducing risk within any given organization.

BRS OSHMS, aligned with recognized international standards is in response to the international demand to harmonized standards worldwide, and one which an organization can be assessed and certified.

What is ANSI/AIHA Z10?

Is a voluntary consensus standard that provides critical management systems requirements and guidelines for improvement of occupational health and safety.

To develop ANSI/AIHA Z10 experts from labor, government, professional organizations and industry contributed to the development of ANSI/AIHA Z10.

ANSI/AIHA Z10, much like BRS OSHMS, focus safety and health of the well being of col-laborators and associates, as well provide contributions to assure sustainability of organization's bottom—line. To contribute to the sustainability of the organization needs to address productivity, financial performance, quality, as well other key indicators that the organization has determined within its business objectives.

Whether OHSAS 18001, ILO-OSH, Loss Prevention... BRS OSHMS address:

- Management Leadership
- Employee Participation,
- Identification, classification and planning,
- Implementation and operational controls,
- Evaluation of effectiveness
- Corrective Action,
- Management Review
